Ohio Ordnance Works, Inc. History

Robert I. Landies, the owner and founder of Ohio Ordnance Works, Inc. (OOW), has been involved in the ordnance industry since 1964. Mr. Landies started his career working at TRW in the Jet Engine Division and eventually transferred to the Navy Torpedo Division. He subsequently gained extensive knowledge in a variety of different weapon systems and designs during his seven years in the U.S. Army serving as an armor officer. Continuing with his life-long interest as a collector and gunsmith of military firearms, he established a full-time business in 1981 that is today known as Ohio Ordnance Works, Inc. (OOW). In the period from 1981 until 1990, OOW engaged primarily in buying and selling military firearms, parts, and accessories in the commercial market. With the addition of qualified employees and manufacturing machinery facilitated the development of a repair department and the ability to manufacture small orders of firearms for the commercial market. In 1990, OOW began manufacturing firearms and ordnance for supply to different foreign and domestic government agencies. This capacity has expanded steadily over the years due to a wide base of weapon system knowledge, highly qualified personnel, state of the art machinery, new technology development and integration, with an absolute commitment to excellence in both products and services.

OOW Now

Today Ohio Ordnance Works, Inc. has a workforce of 80+ employees who work within the company's 35,000+ square foot facility. OOW is currently supplying several thousand light, medium, and heavy machine guns to military customers around the world including our own U.S. forces. Additionally, OOW is manufacturing small arms engineered and modified specifically for training simulators and various military mounting solutions. We have established exclusive partnerships around the world as sole source suppliers for several vehicle and remote weapon control system (RWCS) manufacturers.

OOW is fully licensed to accommodate all aspects of manufacture, sales, and distribution both domestic and overseas, of any ordnance commodity.

OOW Future

OOW is strongly committed to launching exciting new products and upgrades. This commitment is realized with our new OOW240 and OOW249 Patrol versions, lighter and more reliable than current models with increased ability for end user customization.

• OOW249 SQUAD AUTOMATIC WEAPON

The OOW249 is the belt-fed, air-cooled, fully automatic light machine gun currently deployed by U.S. and international forces. Since the invasion of Panama in 1989, the 249 has proven itself in every major U.S. conflict.

The S.A.W. system was found to be the most effective candidate to address the need for more firepower in small units. For over 20 years, it has seen every possible condition and environment and continues to come out on top.

The OOW249 provides infantry fire teams with the heavy volume of fire of a machine gun combined light weight and accuracy that begins to approach that of a rifle. It fires the NATO standard 5.56mm cartridge from a belt or magazine.

Ohio Ordnance Works, Inc. (OOW) is proud to offer the OOW249:

- Consistent, reliable, on-time delivery achieved with ISO certified multi-tier inspections
- Ready for battle right out of the box – tested for functionality and accuracy at the factory
- Risk free purchasing with our “no nonsense” parts and workmanship warranty
- Prepared for any environment or scenario, multiple configuration options allow you to customize to a unit’s specific needs

With the addition of the OOW249 to our production line, OOW has evolved to provide the customer with a single source for their crew served weapons needs.

• OOW240 GENERAL PURPOSE MACHINE GUN (GPMG)

The current issue US general purpose machine gun (GPMG), the 240, is a belt-fed, air-cooled, crew served machine gun system capable of sustained and accurate suppressive fire that far surpasses its predecessor, the M60.

The United States Armed Forces have been using variants of the 240 since the mid-1980s. It was first used in a vehicle/coaxial role but was so popular it was quickly adopted by the infantries of the United States Marines and the United States Army during the 1990s.

The OOW240 has proven to be more durable in tests and in the field than the M60. It fires the NATO 7.62mm round with standardization offering benefits in terms of training, logistics and joint operations.

Improvements in the OOW barrel manufacturing process have increased the life of the OOW240 barrel to over 20,000 rounds.

Providing a competitive and superior quality alternative, Ohio Ordnance Works, Inc. (OOW), offers a complete OOW240 GPMG package. Operator and armorer training as well as all special tools, barrels, parts, and accessories. Depot level repairs and rebuilds are also available with the OOW240 gun system.

240	SKU: 11826290	Coaxial, left feed
240B	SKU: 12976814	Infantry, hydraulic buffer
240C	SKU: 11826175	Coaxial, right feed
240D	SKU 12977099	Spade Grips for aviation use
240G	SKU: 3592714	Infantry, mechanical buffer
240N	SKU: 12999178	Navy, no bipod or heat shield
240 Patrol	SKU: 12976814-P	Infantry, lightweight, patrol

All infantry models available with the patented OOW 240 Select Fire Trigger Assembly shown on page 16 of this catalog. OOW can also provide a custom version to suit your specific needs, contact us for a quote.

• OOW SELECT FIRE TRIGGER ASSEMBLIES

The OOW240 Select Fire Trigger Pack is a practical upgrade for the OOW240/MAG58 weapon system.

This patented trigger pack design offers select fire capability with an easy to operate lever. Simply remove the original trigger group and install the new Select Fire Trigger Pack into your M240 weapon system.

The easy-to-use design features a thumb operated lever to rapidly change from semi to automatic firing. It universally fits all MAG and 240 variants, is interchangeable with the removal of one pin and requires no significant additional training.

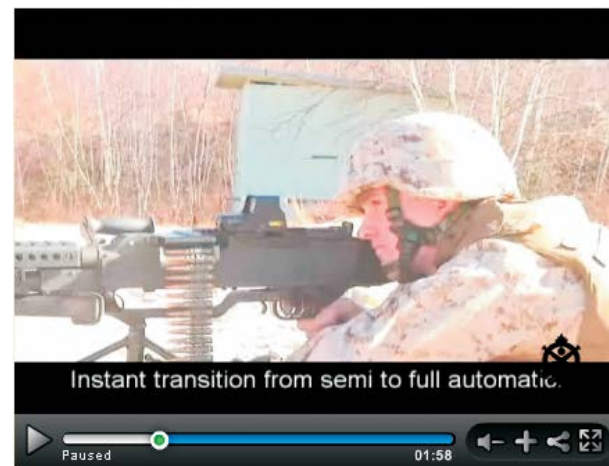

The OOW249 Select Fire Trigger Pack is also a direct parts swap with standard 249 models and allows the operator to quickly and easily swap between semi and automatic firing.

Both Select Fire Trigger Assemblies retain the use of the original safety.

With the ability to switch between semi and automatic the warfighter can engage single targets, conserve ammunition, obtain a perfect zero, or recon by fire without revealing the presence of a machine gun. It also provides the gunner the ability to switch between the role of machine gunner and rifleman. These options broaden strategic and tactical options and provide distinct battlefield advantages.

To ensure combat reliability, we put the trigger pack through rigorous testing:

- Endurance tested with 10,000 rounds fired in full and semi-automatic modes without failure.
- Drop tested at all angles from 2 meters. Sear stayed engaged regardless of shock to the system.
- Selector lever resistance remained constant after endurance testing.
- Trigger Pull remained in accordance with US Army requirements after endurance tests.

• OOW50BMG

The OOW50BMG .50 caliber is one of the specialties of Ohio Ordnance Works, Inc. (OOW). Constructed to exceed military expectations and quality standards, each weapon is built with individualized attention to detail and multi-level inspection of quality.

Since the Second World War, the United States has had versions of the fifty caliber machine gun in service in a variety of roles including aircraft guns, anti-aircraft defensive guns, tripod-mounted infantry guns and dual purpose anti-aircraft and anti-vehicular weapons.

The OOW50BMG will exceed your current heavy machine gun requirements.

OOW50BMG .50 Caliber Heavy Machine Gun
shown on the available M123 tripod.

Cage Code: 1V2A7

Weapon Specifications:

Caliber	.50 BMG
Barrel Length	45 inches
Barrel Twist	1/15
Lands/Grooves	8 Lands, 8 Grooves
Muzzle Thread	1.125-12 LH
Operation	Short Recoil, Closed Bolt
Feed	M2 or M9 Link, Right or Left Hand
Weight	84 lbs
Overall Length	65.13 inches
Max Eff. Range	1,829 meters
Rate of Fire	450-600 rpm
Max Range	6,787 meters

• OOW50BMG-QCB

The OOW50BMG-QCB offers the same protection and capabilities that the classic OOW50BMG offers. It has the same cyclic rate (450 to 600 rpm), effective range (1,829 meters), and ease of maintenance.

What sets the OOW50BMG-QCB apart is the increased safety factor and highly reduced barrel change time. The system's preset headspace settings can mean precious rapid response time under fire once the barrel reaches "hot gun" status.

SKU: M2A1-100E..... Call for Quote

*To request a quote or proposal for US or International tenders, please call **440.285.3481**.*

Eliminate the risks and casualties from improper headspace and timing with the OOW50BMG-QCB .50 Caliber Heavy Machine Gun.

• OOW50BMG-F

OOW's newest member of the .50 caliber family is our "Fast Fifty" which is a hybrid of our traditional Heavy Barrel and a classic Aircraft model. The lighter barrel greatly increases the rate of fire while the M3 top cover ensures smooth feeding and reliability. The OOW50BMG-F is designed to be mounted on vehicles, Naval vessels, and aircraft in order to deliver an 800-900 round per minute rate of fire. The use of over 90% of the parts found in our standard OOW50BMG ensures training and parts availability are not an issue.

SKU: 71590700 Call for Quote

• MK99 TWIN 240 MOUNT

The MK99 240 mount is designed to hold two 240 GPMG machine guns and is available with an optional armor shield. The guns are aligned to give a combined rate of fire of between 1,200 and 1,800 rounds per minute depending on gas regulator settings and are fired individually through their own trigger assemblies.

The mount comes standard with a large pintle and two 400 round ammunition cans. Available in parkerized gray or various powder coat options.

SKU: 113081..... Call for Quote

*To request a quote or proposal for US or International tenders, please call **440.285.3481**.*

A right hand feed top cover and feed tray is required for the right hand weapon on this mount and is included with purchase of the mount.

phone: 440.285.3481 • **fax:** 440.286.8571 • **email:** sales@oowinc.com

• MK93 MOUNT

The MK93 mount is a dual purpose mount for the .50 caliber Heavy Machine Gun and the MK19 Mod 3 Grenade Launcher.

The mounting system is designed for use on vehicle, boat/ship, or tripod and uses hydraulic buffers that allow for easy control of the weapon.

The MK93 requires no external adapters or tools to mount the M2 or MK19. Adaptors are available for many other common weapon systems including the 249, 240 and M60.

The mount comes with small or large pintle, 100 or 250 round ammunition holder, and optional Armor Shield.

*To request a quote or proposal for US or International tenders, please call **440.285.3481**.*

Mount and ammo can shown.

Cage Code: 1V2A7

Mount and ammo can shown on optional MK16 Mod 9 stand.

Mount and stand shown with optional armor shield.

• HELO AND TWIN .50 CALIBER MOUNT

The MK95 Mod 2 Machine Gun Mount is for use with twin .50 cal Machine Guns. The improved Mod 2 mount no longer requires feed chutes as in previous models. The mount is manufactured using corrosive resistant materials and finish. It features shock absorbers that greatly reduce the recoil force, two 250 round .50 cal ammunition cans, a central ring and post sight, and a travel lock for stowing the mount in a neutral position. Also available with an optional armor shield.

The MK94 Machine gun Mount provides a secure means of mounting the .50 cal machine gun in a helicopter. It is fabricated in aluminum and stainless steel and has a 100 round ammo can that can be mounted on either side of the mount and an elevation stop. Can be furnished with HELO pintle 3392AS1254.

• MK123 MOD 1 LIGHT WEIGHT TRIPOD

Lightweight .50 Cal. Tripod. Massive weight reduction = immediately lighter combat load!

Manufactured of high strength aluminum, this lightweight tripod comes complete with pintle and traverse & elevation mechanism, and weighs only 19 pounds. Compared to its 44lb. predecessor, this is a weight reduction of 43%! Similar to the M3 tripod, this lighter version is easier to transport in the field yet rugged enough for constant firing from a dug in position. Accepts the same mounts as the traditional M3 tripod. Black anodized finish.

SKU: M123 Call for Quote

*To request a quote or proposal for US or International tenders, please call **440.285.3481**.*

The MK 123 Mod. 1 lightweight .50 Caliber Tripod weighs only 19 lbs. and has a durable, black anodized finish. (MK93 cradle mount shown not included.)

Cage Code: 1V2A7

• MK16 MOD 8 AND MOD 9 STANDS

The MK16 Mod 8 Stand accepts the standard large pintle on the gun mount. The pintle is held in place by a pintle lock located on the front of the stand. The stand features a safety train stop that limits the arc of fire of the weapon and a travel lock can be installed to secure the weapon and mount when not in use.

With the addition of the stainless steel tripod, the MK16 Mod 8 becomes a Mod 9 and is the basic and most often used stand configuration for mounting most conventional small arm weapons on shipboard platforms. The tripod can be installed with one leg forward or two depending on shipboard requirements.

Mod 8 SKU: 53711-6086286..... Call for Quote

Mod 9 SKU: 53711-60876279..... Call for Quote

*To request a quote or proposal for US or International tenders, please call **440.285.3481**.*

• ARSENAL LEVEL REPAIR OR REBUILD SERVICES

Arsenal Level Small Arms and Crew Served Weapon System Repair or Rebuild Services

Ohio Ordnance Works, Inc. (OOW) is proud to offer a full service, arsenal level repair division. We specialize in the repair of past and current military small arms up to, and including, the M2 .50 caliber machine gun. We supply new MIL spec, new old stock, and Grades A & B used parts. OOW can also manufacture some of those hard to find parts.

When received, all weapons are inspected according to our ISO 9001 standards, and then repair/rebuild is quoted based on time and material. All repairs are pre-authorized by the customer. The weapon is test fired to verify the correct function of the repair, then cleaned and final inspected. Every weapon that comes into our facility leaves in complete working order.

Some of the services that we provide include:

- TIG and MIG welding of receivers and parts
- Lathe work including single point thread cutting
- Manual Milling work
- Heat Treating and Tempering
- Magnaflux Inspection for cracks and defects
- Complete Rebuilds/Refurbishments
- Refinishing (Parkerizing, Black Oxide, Bluing, etc.)
- Gaging and Headspacing

All repairs come with a One-Year Guarantee on parts and labor. This guarantee excludes any customer modifications or repair attempts as well as the use of improper ammunition.
